1 Nature of operations

KWG Resources Inc. (the "Company"), an exploration stage company, is involved in the exploration for diamonds and base and precious metals. It has interests in properties at the exploration stage all located in Canada.

Until it is determined that properties contain mineral reserves or resources that can be economically mined, they are classified as exploration properties. The recoverability of deferred exploration expenses is dependent upon: the discovery of economically recoverable reserves and resources; securing and maintaining title and beneficial interest in the properties; the ability to obtain necessary financing to complete exploration, development and construction of processing facilities; obtaining certain government approvals; and attaining profitable production.

For the six-month period ended June 30, 2008, the Company incurred a loss of $6,104,284. Cash and cash equivalents as at June 30, 2008 amount to $3,874,122 of which $1,754,799 can be used for working capital purposes (note 4). In addition to ongoing working capital requirements such as general and administration costs, the Company must secure sufficient funding for its existing commitments for exploration and development programs.

2 Basis of presentation

These consolidated financial statements have been prepared using Canadian generally accepted accounting principles applicable to a going concern, and do not reflect the adjustments to the carrying values of assets and liabilities, the reported revenues and expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate. These adjustments could be material.

These consolidated interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to interim consolidated financial statements, and follow the same accounting policies and methods in their application as the most recent annual consolidated financial statements of the Company except for the modifications described below. In the opinion of management, all adjustments considered necessary for fair presentation of the results for the periods presented have been reflected in the interim consolidated financial statements. The interim consolidated financial statements should be read in conjunction the Company's audited consolidated financial statements and the notes thereto for the year ended December 31, 2007.

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary Debuts Diamonds Inc., an inactive company, incorporated in Ontario, Canada on October 18, 2007.

3 Accounting policies modifications

On January 1, 2008 the Company adopted the new recommendations of the Canadian Institute of Chartered Accountants ("CICA") under CICA Handbook Section 3862.

1. Sections 3862, "Financial instruments – Disclosures", and 3863, "Financial instruments Presentation", replace Handbook Section 3861, "Financial instruments – Disclosure and Presentation", revising and enhancing its disclosure requirements, and carrying forward unchanged presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial

instruments and how the entity manages those risks. The new standards apply to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2007. Disclosure and presentation requirements pertaining to these sections are contained in note 13.

2. Section 1535, “Capital disclosures”, establishes standards for disclosing information about an entity’s capital and how it is managed. It describes the disclosure of the entity’s objectives, policies and processes for managing capital, the quantitative data what the entity regards as capital, whether the entity has complied with any capital requirements, and if it has not complied, the consequences of such non-compliance. The new requirements are effective for interim periods beginning on or after October 1, 2007.

3. Section 1400, “General standards of Financial Statements Presentation”, was amended to include requirements to assess and disclose an entity’s ability to continue as a going concern. The new requirements are effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2008.

4 Cash and cash equivalents

As at June 30, 2008, cash and cash equivalents include an amount of $2,119,323 (2007 – $3,363,015) reserved for new exploration activities to be conducted in Canada before December 31, 2008.

5 Temporary investments

The portfolio investments consist of common shares of publicly held companies that are available for sale and are recorded at fair value.

(a) On May 15, 2006, the Company and Spider Resources Inc. ("Spider") agreed to amend and revise their joint venture agreement. The companies agreed to treat each project in their joint venture as a separate joint venture, to enable each company to either increase or decrease its interest in a project based upon their respective strategic objectives. The Company and Spider agreed to have their respective interest established at 50% in all the current projects of the joint venture.

Each party agreed to have its interest diluted by not contributing further to the other party's exploration program until its interest has reached $33^{1/3}$%. At that level, a party's interest in a project may be maintained by contribution to subsequent programs, or suffer further dilution. When an interest has been reduced to less than 10%, it will be automatically converted to a 0.5% Net Smelter Royalty ("NSR") in base metals and a 1% NSR in precious metals and diamonds.

The following table outlines the estimated cumulative interest by projects for the Company and Spider as at June 30, 2008.
