

KWG RESOURCES INC.

CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2015 AND 2014

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

All of the information in the accompanying consolidated financial statements of KWG Resources Inc. is the responsibility of management. The consolidated financial statements have been prepared by management in accordance with International Financial Reporting Standards. Where necessary, management has made judgments and estimates in preparing the consolidated financial statements and such statements have been prepared within acceptable limits of materiality.

Management maintains appropriate systems of internal control to give reasonable assurance that its assets are safeguarded and the financial records are properly maintained.

The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and internal control and exercises this responsibility principally through the Audit Committee. The Audit Committee, which is comprised of Directors, none of whom are employees or officers of the Company, meets with management and the external auditors to review the auditor's report and the consolidated financial statements to satisfy itself that management is properly discharging its responsibilities to the Directors, who approve the consolidated financial statements.

A firm of independent Licensed Public Accountants was appointed by the shareholders to examine the consolidated financial statements and provide an independent professional opinion thereon. The external auditors have free and full access to the Audit Committee with respect to their findings regarding the fairness of financial reporting and the adequacy of internal controls.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of KWG Resources Inc.

We have audited the accompanying consolidated financial statements of KWG Resources Inc. and its subsidiaries, which comprise the consolidated balance sheets as at December 31, 2015 and 2014, and the consolidated statements of operations and statements of comprehensive loss, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of KWG Resources Inc. and its subsidiaries as at December 31, 2015 and 2014, and their financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which indicates that the company had continuing losses during the year ended December 31, 2015 and a working capital deficiency as at December 31, 2015. These conditions along with other matters set forth in Note 1 indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

1 NATURE OF OPERATIONS

KWG Resources Inc. (“KWG” or the “Company”) is an incorporated entity domiciled in Canada. The Company’s registered office is located at 600 de Maisonneuve Boulevard West, Suite 2750, Montreal, Quebec, H3A 3J2. KWG is involved in the exploration and evaluation of base and precious metals and in the development of a transportation link to access the remote areas where these are located. It has interests in properties located in Canada. It also has interests in certain technology relating to the production of chromium iron alloys. It was incorporated under the laws of Quebec on August 21, 1937.

The Company’s shares are listed for trading on the Canadian Securities Exchange under the symbol “KWG”.

The Company is in the process of exploring its exploration and evaluation projects and has not yet determined whether its exploration and evaluation projects contain mineral deposits that are economically recoverable. The Company will periodically have to raise additional funds to continue its exploration activities and, while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

Until it is determined that properties contain mineral reserves or resources that can be economically mined, they are classified as exploration and evaluation properties. The recoverability of exploration and evaluation project expenditures is dependent upon: the discovery of economically recoverable reserves and resources; securing and maintaining title and beneficial interest in the properties; the ability to obtain necessary financing to complete exploration, development and construction of mining and processing facilities; obtaining certain government approvals; and attaining profitable production.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company’s title. The holding of mineral rights does not provide full rights to the surface of the lands over those mineral rights – such surface rights may be held or acquired by third parties. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims, failure to complete assessment work and file reports in respect thereof and non-compliance with regulatory and environmental requirements. Furthermore, there is no assurance that the interest of the Company in any of its properties may not be challenged or impugned.

The Company has a need for equity capital and financing for working capital and exploration and evaluation of its properties. Because of continuing operating losses and a working capital deficit the Company’s continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. These conditions indicate the existence of a material uncertainty that casts significant doubt about the Company’s ability to continue as a going concern. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements. Such adjustments could be material.

2 BASIS OF PREPARATION

Statement of Compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and its interpretations adopted by the International Accounting Standards Board (“IASB”).

These financial statements were approved by the board of directors for issue on April 29, 2016.

Basis of Measurement

The consolidated financial statements have been prepared under the historic cost convention, except for investments in equity securities and derivatives, including warrants, which are measured at fair value. The methods used to measure fair values are discussed further in Note 24.

3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

Basis of Consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries: Canada Chrome Corporation, SMD Mining Corporation, Canada Chrome Mining Corporation, Muketi Metallurgical General Partner Inc. and Muketi Metallurgical KWG-Limited Partner Inc. as well as the accounts of its 70% owned subsidiary, Debut Diamonds Inc. (“DDI”). All of the Company’s subsidiaries are incorporated in Canada.

Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. The financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

Foreign Currency

(i) Functional and presentation currency

Items included in the financial statements of each consolidated entity in the KWG group are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The functional currency of KWG and all of its subsidiaries is the Canadian dollar.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than an entities’ functional currency are recognized in the consolidated statements of operations in “gain(loss) on foreign exchange”.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held with banks, and other short-term highly liquid investments with original maturities of three months or less.

Financial Instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the obligation specified in the contract is discharged, cancelled or expires.

At initial recognition, the Company classifies its financial instruments in the following categories:

(i) *Financial assets and liabilities at fair value through profit or loss*

A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term.

Derivatives are also included in this category unless they are designated as hedges. The Company has invested in and has issued warrants that qualify as derivatives. All derivatives have been classified as held-for-trading and are included on the consolidated balance sheet within marketable securities or warrant liabilities. Gains and losses on re-measurement of the fair value of warrants are included in the consolidated statements of operations in either finance income or gain (loss) on revaluation of warrant liability.

Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the consolidated statements of operations. Gains and losses arising from changes in fair value are presented in the consolidated statements of operations in the period in which they arise. Non-derivative financial assets and liabilities at fair value through profit or loss are classified as current except for the portion expected to be realized or paid beyond twelve months of the balance sheet date, which are classified as long-term. Warrants are classified as current.

(ii) *Available-for-sale investments*

Available-for-sale investments are non-derivatives that are either designated in this category or not classified in any of the other categories. The Company's available-for-sale assets comprise investments in equity securities included in marketable securities on the balance sheet.

Available-for-sale investments are recognized initially at fair value plus transaction costs and are subsequently carried at fair value. Gains or losses arising from re-measurement are recognized in other comprehensive loss. When an available-for-sale investment is sold or impaired, the accumulated gains or losses are moved from accumulated other comprehensive loss to the statement of operations and are included in gain (loss) on marketable securities. Available-for-sale investments are classified as non-current, unless management expects to dispose of them within twelve months.

Dividends on available-for-sale equity instruments are recognized in the statement of operations as dividend income when the Company's right to receive payment is established.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

(iii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company's loans and receivables comprise receivables, and cash and cash equivalents, and are included in current assets due to their short-term nature. Loans and receivables are initially recognized at the amount expected to be received, less, when material, a discount to reduce the loans and receivables to fair value. Subsequently, loans and receivables are measured at amortized cost using the effective interest method less any provision for impairment.

(iv) Financial liabilities at amortized cost

Financial liabilities at amortized cost consist of trade and other payables. Trade and other payables are initially recognized at the amount required to be paid, less a discount to reduce the payables to fair value. Subsequently, trade and other payables are measured at amortized cost using the effective interest method. These are classified as current liabilities if payment is due within twelve months. Otherwise, they are presented as non-current liabilities.

Impairment of Financial Assets

At each reporting date, the Company assesses whether there is objective evidence that a financial asset (other than a financial asset classified as fair value through profit or loss) is impaired. The criteria used to determine if objective evidence of an impairment loss include:

- (i) significant financial difficulty of the obligor;
- (ii) delinquencies in interest or principal payments; and
- (iii) it becomes probable that the borrower will enter bankruptcy or other financial reorganization.

For equity securities, a significant or prolonged decline in the fair value of the security below its cost is also evidence that the assets are impaired. If such evidence exists, the Company recognizes an impairment loss, as follows:

(i) Financial assets carried at amortized cost

The loss is the difference between the amortized cost of the loan or receivable and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. The carrying amount of the asset is reduced by this amount through the use of an allowance account.

(ii) Available-for-sale financial assets

The impairment loss is the difference between the acquisition cost of the asset and its fair value at the measurement date, less any impairment losses previously recognized in the statement of operations. This amount represents the loss in accumulated other comprehensive loss that is reclassified to net loss.

Impairment losses on financial assets carried at amortized cost and available-for-sale debt instruments are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized. Impairment losses on available-for-sale equity instruments are not reversed.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Property and Equipment

(i) *Recognition and measurement*

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes any expenditure that is directly attributable to the acquisition of the asset.

When parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Gains and losses on disposal of an item of property and equipment are determined by comparing the proceeds from disposal with the carrying amount of property and equipment and are recognized net in the consolidated statement of operations.

(ii) *Amortization*

Amortization is calculated as a function of the depreciable amount, which is the cost of an asset less its residual value.

Amortization is recognized through operations as follows over the estimated useful lives of each part of an item of property and equipment.

Amortization is computed using the straight-line method based on the following number of periods:

Computer equipment	-	2 years
Automobiles	-	3 years
Office furniture	-	5 years

Amortization methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

Impairment of Non-Financial Assets

The carrying amounts of the Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit ("CGU") (see definition below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or groups of assets. Generally, a CGU is analogous to an individual project.

An impairment loss is recognized if the carrying amount of an asset or a CGU exceeds its estimated recoverable amount. Impairment losses are recognized in the consolidated statement of operations.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that it does not exceed the carrying amount that

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

would have been determined, net of depreciation or amortization, if no impairment loss had been recognized in prior periods.

Exploration and Evaluation Projects

(i) *Exploration & Evaluation expenditures*

Exploration & Evaluation (“E&E”) expenditures relate to costs incurred on the exploration for and evaluation of potential mineral reserves and includes costs related to the following: acquisition of exploration rights; conducting geological studies; exploratory drilling and sampling and evaluating the technical feasibility and commercial viability of extracting a mineral resource.

E&E expenditures, including costs of acquiring licenses, are capitalized as Exploration and Evaluation Projects (“E&EP”) assets on an “area of interest basis” which generally is defined as a project. The Company considers a project to be an individual geological area whereby the presence of a mineral deposit is considered favourable or has been proved to exist and, in most cases, comprises of a single mine or deposit.

E&EP assets are recognized if the rights to the project are current and either:

- the expenditures are expected to be recouped through successful development and exploitation of the project, or alternatively by its sale; or
- activities on the project have not, at the reporting date, reached a stage which permits a reasonable assessment of the existence of economically recoverable reserves and active and significant operations in, or in relation to, the project are continuing.

E&E expenditures are initially capitalized as E&EP assets. Such E&E expenditures may include costs of licence acquisition, technical services and studies, seismic acquisition, exploration drilling and testing, materials and fuels used, rentals and payments made to contractors and consultants. To the extent that a tangible asset is consumed in developing an E&EP asset, the amount reflecting that consumption is recorded as part of the cost of the intangible asset.

Once the technical feasibility and commercial viability of the extraction of mineral reserves in a project are demonstrable and permitted, E&EP assets attributable to that project are first tested for impairment and then reclassified to *mine property and development projects*. Currently, the Company does not hold any assets classified as *mine property and development projects*.

(ii) *Impairment*

E&EP assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an E&EP asset may exceed its recoverable amount and any impairment loss is recognized as “Write down of exploration and evaluation projects” through the consolidated statements of operations. The following facts and circumstances, among other things, indicate that E&EP assets must be tested for impairment:

- the term of exploration license for the project has expired during the reporting period or will expire in the near future and is not expected to be renewed;

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

- substantive expenditure on further exploration for and evaluation of mineral resources in the project area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the project area have not led to the discovery of commercially viable quantities of mineral resources and the Company plans to discontinue activities in the specific area; or
- sufficient data exists to indicate that while development activity is likely to proceed, the carrying amount of the E&EP asset is unlikely to be recovered in full through such activity.

E&EP assets are tested for impairment on an individual project (area of interest) basis. As noted above, a project would also be tested for impairment before being transferred to “Exploration and Evaluation Projects” on the consolidated balance sheet.

Borrowing Costs

Borrowing costs attributable to the acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are recognized as interest expense in the statement of operations in the period in which they are incurred.

Short-term Employee Benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under short-term cash bonus plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be reliably estimated.

Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be reliably estimated and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as a finance cost.

In accordance with the Company’s environmental policy and applicable legal requirements, a provision for site restoration or decommissioning in respect of land restoration, and the related expense, is recognized when the land is contaminated and there is a legal obligation to restore the site. The Company presently has no decommissioning liabilities.

Finance Income

Finance income comprises interest income on marketable securities, FV gains of financial assets classified as FVTPL, and flow-through premium. Interest income is recognized as it accrues through operations, using the effective interest method.

Foreign currency gains and losses are reported on a net basis.

Income Taxes

Income tax expense comprises current and deferred tax. Income tax expense is recognized through operations except to the extent that it relates to items recognized either in OCL or directly in equity, in which case it is recognized in OCL or in equity respectively.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Current income tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date and any adjustment to tax payable in respect of previous years.

Deferred income tax is recognized using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly-controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Share Capital

Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

The Company has financed a portion of its exploration and evaluation activities through the issue of flow-through shares. Under the terms of these share issues, the tax attributes of the related expenditures are renounced to subscribers. Common shares issued on a flow-through basis typically include a premium because of the tax benefits associated therewith ("Flow-through Premium"). Flow-through shares may also be issued with a warrant feature. At the time of issue, the Company estimates the proportion of proceeds attributable to the Flow-through Premium, the common share and the warrant with reference to closing market prices and such techniques as the Black-Scholes option-pricing model. The Flow-through Premium is estimated as the excess of the subscription price over the market value of a regular common share and estimated fair value of the warrant and is recorded as a separate liability which is included in trade and other payables on the consolidated balance sheets (Note 12). The proceeds attributable to the warrants issued in the Company's functional currency are also treated as equity and recorded in warrants on the balance sheet until exercise, when the associated proportion is transferred to share capital along with the cash proceeds received on exercise. Upon expiry, the original fair value of the warrants is transferred to contributed surplus.

The effect of renunciation of the tax benefits to holders of such shares is recognized pro-rata with the associated expenditures being incurred by the Company. This could occur either before or after the formal renunciation of expenditures to the tax authorities have been made.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

When the eligible expenditures are incurred, the tax value of the renunciation is recorded as a deferred tax liability and charged against operations as a deferred tax provision.

Furthermore, as eligible expenditures are incurred, the Company recognises a pro-rata amount of the Flow-through Premium through "Finance income" in the consolidated statements of operations with a decrement to the liability on the consolidated balance sheet. Flow-through shares renunciations of expenditures are subject to the significant judgment of management in determining the eligibility of the expenditures incurred and are potentially subject to challenge by income tax authorities based on the nature of the amounts incurred. Management has taken and will continue to take actions to mitigate the risk of challenge, if any occurs. To the extent these are disallowed, the Company would generate additional tax attributes to assess for recognition in the financial statements. Additional costs may be incurred.

Share-Based Payment Arrangements

Stock Option Plan

The Company has a stock option plan (the "Stock Option Plan") which is described in Note 15. All share-based awards made to employees and others providing similar services are recognized at the date of grant using a fair-value-based method to calculate compensation expense. Compensation expense is charged to operations over the vesting period of the options with a corresponding increase to contributed surplus. Stock options typically vest over an 18-month period. The fair values are determined at the grant date by applying the Black-Scholes option pricing model. Measurement inputs include share price on the measurement date, exercise prices, expected volatility based on available historical volatility of the Company's share price, expected life, expected dividends, expected forfeiture rate and the risk free interest rate. Under graded vesting the fair value of each tranche is recognized over its respective vesting period.

The amount recognized as an expense is adjusted to reflect the actual number of share options for which the related service and non-market vesting conditions are met.

Share-based payment arrangements in which the Company receives properties, goods or services as consideration for its own equity instruments are accounted for as equity-settled share-based payment transactions, regardless of how the equity instruments are obtained by KWG.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service. For those options that expire after vesting, the recorded value is transferred to contributed surplus.

Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") data for its common shares. Basic EPS is calculated by dividing the results of operations attributable to ordinary shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted EPS is determined by adjusting the results of operations attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares, which comprise warrants and share options. Options and warrants have a dilutive effect only when the

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

average market price of ordinary shares during the period exceeds the exercise price of the options or warrants.

Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost, which comprises its purchase price plus any directly attributable costs of preparing the asset for its intended use. The cost of intangible assets acquired in a business combination is the fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization on a straight-line basis over their useful lives and any accumulated impairment losses. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of operations when the asset is derecognized.

Recent Accounting Pronouncements

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after January 1, 2016 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity’s own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IAS 1 – Presentation of Financial Statements (“IAS 1”) was amended in December 2014 in order to clarify, among other things, that information should not be obscured by aggregating or by providing immaterial information, that materiality considerations apply to all parts of the financial statements and that even when a standard requires a specific disclosure, materiality considerations do apply. The amendments are effective for annual periods beginning on or after January 1, 2016.

IAS 38 - Intangible Assets (“IAS 38”) and IAS 16 – Property, Plant and Equipment (“IAS 16”), were amended in May 2014 to introduce a rebuttable presumption that the use of revenue-based amortization methods is inappropriate. The amendments are effective for annual periods beginning on or after January 1, 2016.

Changes in Accounting Policies

The Company has adopted the following new standards, along with any consequential amendments, effective January 1, 2015. These changes were made in accordance with the applicable transitional provisions and did not have a material impact on the Company’s consolidated financial statements.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

IFRS 13 – Fair Value Measurement (“IFRS 13”) was amended to clarify that the exception which allows fair value measurements of a group of financial assets and liabilities on a net basis applies to all contracts within the scope of IAS 39 or IFRS 9, regardless of whether they meet the definitions of financial assets or liabilities as defined in IAS 32.

IAS 24 – Related Party Disclosures (“IAS 24”) was amended to clarify that an entity providing key management services to the reporting entity or the parent of the reporting entity is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity.

4 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

It is reasonably possible that, on the basis of existing knowledge, outcomes in the next financial year that are different from the assumptions used could require a material adjustment to the carrying amount of the asset or liability affected.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Management has made a number of significant estimates and valuation assumptions based on present conditions and management’s planned course of action as well as assumptions about future business and economic conditions which include, but are not limited to, the following:

Capitalization of exploration and evaluation costs

Management has determined that exploration and evaluation costs incurred during the year have future economic benefits and are economically recoverable. In making this judgment, management has assessed various sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probably mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 10 for details of capitalized exploration and evaluation costs.

Impairment of exploration and evaluation projects

While assessing whether any indications of impairment exist for exploration and evaluation projects, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation projects. Internal sources of information include the manner in which exploration and evaluation projects are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future after-tax cash flows expected to be derived from the Company’s exploration and evaluation projects, costs to sell the properties and the appropriate discount rate. Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Company's exploration and evaluation projects.

Income taxes and recoverability of potential deferred tax assets

In assessing the probability of realizing income tax assets recognized, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company considers whether relevant tax planning opportunities are within the Company's control, are feasible, and are within management's ability to implement. Examination by applicable tax authorities is supported based on individual facts and circumstances of the relevant tax position examined in light of all available evidence. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.

Share-based payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviours and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

Income, value added, withholding and other taxes

The Company is subject to income, value added, withholding and other taxes. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income, value added, withholding and other tax liabilities requires interpretation of complex laws and regulations. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax related filings are subject to government audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made.

Contingencies and commitments

Refer to Note 22.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

5 ACQUISITION OF DEBUT DIAMONDS INC.

On January 27, 2015, the Company acquired an additional 144,464,000 common shares in the capital of DDI through a private placement from treasury at a rate of \$0.01 per share in settlement of all of the debt owed by DDI to KWG, including accrued interest thereon. As a result of this transaction, KWG now owns 144,630,000 common shares representing 70.81% of the issued and outstanding common shares of DDI.

This transaction has been treated as an asset acquisition as DDI does not meet the definition of a business in accordance with IFRS 3. The fair value of the DDI shares acquired was \$722,320 based on the market value of DDI on the date of the transaction, which was \$0.005 per share. The book value of the DDI debt on that date was \$661,347; therefore, the Company recorded a gain of \$60,973 on the acquisition of these shares.

In addition to owning 166,000 common shares just prior to this transaction, the Company also owned 7,000,000 DDI warrants (Note 8(iii)) with a fair value of \$63,000 on January 27, 2015. The total fair value of the DDI securities held by KWG on the transaction date was \$786,150. This was allocated to DDI's identifiable assets and liabilities as follows:

Cash and cash equivalents	36,579
Receivables	6,347
Marketable securities:	
178,000 common shares of Renforth Resources Inc.	4,450
5,757,000 common shares of KWG Resources Inc.	143,926
21,000,000 warrants of KWG Resources Inc.	21,000
Exploration and evaluation project:	
MacFadyen Kimberlites	604,442
Trade and other payables	(30,594)
	<hr/>
	786,150

The KWG common shares and warrants were transferred to treasury upon their acquisition by the Company.

- (i) On June 9, 2011, KWG acquired 7,000,000 common shares and 7,000,000 warrants (each warrant entitling the holder to purchase one common share for \$0.10 on or before June 9, 2013) in GoldTrain in exchange for the settlement of a debt owed by GoldTrain to KWG. On June 9, 2011, the market value of the GoldTrain shares was \$280,000. The warrants were valued at \$151,200 on the date of acquisition. The 7,000,000 warrants expired unexercised. On March 5, 2014, KWG acquired 3,350,000 common shares in GoldTrain at a price of \$0.02 per share in settlement of \$67,000 of debt owed by GoldTrain to KWG. In addition to these transactions, the Company has acquired an additional 345,000 common shares through purchases on the open market. KWG's holdings represent approximately 18% of the issued and outstanding common shares of GoldTrain.
- (ii) On December 21, 2011, KWG acquired 3,080,580 common shares, 3,080,580 premium warrants and 1,540,290 regular warrants of Eloro in exchange for 100% of the issued and outstanding common shares of 6949541 Canada Inc ("6949541"), a wholly-owned subsidiary of KWG. Each premium warrant entitles the holder to purchase one common share of Eloro for \$1.00 on or before November 18, 2016. If the closing price of the common shares of Eloro is over \$1.50 per share for 20 consecutive trading days following the expiry of the 4-month hold period, the premium warrants must be exercised within 10 business days of Eloro providing written notice, or they will be cancelled. The premium warrants were valued at \$71,187 on the acquisition date. Each regular warrant entitled the holder to purchase one common share for \$0.24 on or before May 18, 2013. The regular warrants expired unexercised. On September 30, 2014, Eloro consolidated its common shares on a 1 for 10 basis. During 2015, the Company sold 91,500 Eloro shares on the open market for cash proceeds of \$15,221. A gain of \$1,496 was recognized on these dispositions.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

- (iii) On August 29, 2011, KWG acquired 7,000,000 common shares and 7,000,000 warrants (each warrant entitling the holder to purchase one common share for \$0.40 on or before August 29, 2016) in DDI in exchange for 21,000,000 common shares and 21,000,000 warrants (each warrant entitling the holder to purchase one common share for \$0.15 on or before August 29, 2016) in KWG. The value attributed to the shares was based on KWG's market value on August 29, 2011, which was \$0.085 per share since there was no comparable information for DDI. The warrants were valued at \$1,638,000 on the acquisition date. The common shares of DDI were subsequently distributed to KWG's shareholders as a return of capital in December 2011. During the year ended December 31, 2012, the Company purchased 166,000 common shares of DDI on the open market. On July 24, 2012, DDI announced that it was reducing the exercise price on all of its warrants to \$0.07 per warrant effective as of that day. There are no other changes to the terms of the warrants. On January 27, 2015, KWG acquired an additional 144,464,000 common shares in the capital of DDI through a private placement from treasury in settlement of all of the debt owed by DDI to KWG (Note 5). As a result of this transaction, KWG now owns 144,630,000 common shares representing 70.81% of the issued and outstanding common shares of DDI. DDI's assets and liabilities are now included in these consolidated financial statements.
- (iv) On June 25, 2014, KWG acquired 200 common shares of Cliffs Natural Resources Inc. on the open market for a total cash cost of \$3,082.
- (v) During 2015, DDI sold 178,000 common shares of Renforth Resources Inc. ("Renforth") on the open market for cash proceeds of \$4,828. A gain of \$377 was recorded on these transactions.

Warrants

The financial assets at FVTPL consist of warrants which are not publicly-traded. However, their valuation can be obtained through the use of a valuation model, the inputs for which are readily determinable. Any change in fair value after initial recognition, is recorded through the consolidated statements of operations as a finance income (loss). The fair value of the warrants did not change during 2015 (increase of \$35,000 in 2014).

The following table summarizes the inputs that were used to calculate the fair value of the warrants as at December 31, 2015:

	Eloro Premium
Expiry date	Nov 18/16
Average dividend per share	Nil
Estimated volatility	61.05
Risk-free interest rate	0.48%
Expected life of the options granted	323 days
Calculated value per warrant	<u>\$0.000</u>

Sensitivity Analysis - Equity Price Risk

All of the Company's financial assets classified as available for sale are listed on public stock exchanges. For such investments, a 10% increase in the equity prices at the reporting date would have increased equity by approximately \$8,000 (as at December 31, 2014 - an increase of \$7,000), an equal change in the opposite direction would have had the equal but opposite effect on the amounts shown above.

For financial assets classified at FVTPL, the impact on operations of a 10% increase in the fair

KWG RESOURCES INC.**Notes to the Consolidated Financial Statements (in Canadian dollars)**

value of these warrants at the reporting date would not have had any impact (\$6,000 increase as at December 31, 2014). An equal change in the opposite direction would have had the equal but opposite effect on the amounts shown above.

The analyses were performed on the same basis for 2015 and 2014.

- (i) On May 15, 2006, the Company and Cliffs Chromite Far North Inc. (“Cliffs”), formerly Spider Resources Inc., agreed to amend and revise their joint venture agreement. The companies agreed to treat each project in their joint venture as a separate joint venture, to enable each company to either increase or decrease its interest in a project based upon their respective strategic objectives. The Company and Cliffs agreed to have their respective initial interest established at 50% in all the current projects of the joint venture.

Each party’s interest is diluted by not contributing further to the other party’s exploration program until its interest has reached 33 1/3%. At that level, a party’s interest in a project may be maintained by contribution to subsequent programs, or suffer further dilution. When an interest has been reduced to less than 10%, it will be automatically converted to a 0.5% Net Smelter Royalty (“NSR”) in base metals and a 1% NSR in precious metals and diamonds. As of December 31, 2015 the Company held a 50% interest in these projects.

- (ii) The Company owns a 30% interest in certain mining property claims contiguous to McFauld’s Lake in Ontario.
- (iii) During 2009, the Company commenced efforts to explore and develop a transportation link to the Company’s properties in Northern Ontario in order to increase the economic viability of these properties. These operations entailed a detailed analysis of railroad route alternatives, preliminary soils analysis and claim staking. Concurrent with this activity the Company is performing exploration activities on these claims.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

- (iv) On June 1, 2012 the Company purchased, for \$100,000 in cash, 2,000,000 units (representing 7.5% of the outstanding units) and 2,000,000 warrants of The Temagami Iron Limited Partnership ("Temagami"). The warrants may be exercised to acquire additional partnership units at \$0.05 each at any time within 90 days after the receipt of a compilation report on the property. These funds were used by Temagami to update studies and provide KWG with an opportunity to review and participate further, if appropriate. In April of 2013 the Company exercised 300,000 of these warrants for a cash consideration of \$15,000. The Company now owns 2,300,000 units (representing 8.6% of the outstanding units) of the partnership. This project was written down to a nominal amount during the year.
- (v) On March 4, 2013, the Company signed an agreement with Bold Ventures Inc. ("Bold") to fund Bold as the Operator to drill the Black Horse chromite discovery. The intent of the program is to determine whether this chromite mineralization occurs in sufficient quantity and quality to demonstrate the feasibility of mining it. Bold entered into an option agreement (the "Fancamp Option") to acquire the Black Horse claims from Fancamp Exploration Ltd. ("Fancamp"). Under the Fancamp Option, Bold can earn up to a 100% working interest in the Black Horse property through a four-stage process. Bold can earn a 50% interest under the first stage by making option payments totalling \$1,500,000 and incurring exploration expenditures of at least \$8,000,000 over a 3 year period. The second stage provides for a further 10% interest that may be earned by Bold at any time by delivery of a positive feasibility study and by making a payment of \$700,000 in cash and/or stock, at the option of Bold. Under the third stage Bold can earn a further 20% interest by agreeing to pay Fancamp \$15,000,000, payable in equal instalments, over three years with half of the amount payable in cash and the balance payable, at Bold's option, through the issuance of common shares of Bold, or its assignee, at the market price at the time the shares are issued. If the option under the third stage is exercised, the fourth stage would provide Bold with the option to acquire Fancamp's remaining 20% interest in exchange for a gross metal royalty. Fancamp would then be entitled to be paid 2% of the total revenue from the sale of all metals and mineral products from the property from the commencement of commercial production. Once all of the capital costs to bring the project to the production stage have been repaid entirely, the gross metal royalty may be scaled up to a maximum of 4% of the total revenue from the sale of all metals and mineral products from the property depending upon the price of product sold. The options under stages three and four must be exercised within 90 days following the date that Bold earns its 60% interest.

Under the terms of the agreement between KWG and Bold, KWG can acquire up to 80% of Bold's interest in the Fancamp Option, in respect of chromite only, by funding 100% of Bold's option payments and programs under the four stages listed above. For nickel and other non-chromite minerals identified during the exploration programs, the parties have agreed to form a joint venture in which KWG has a 20% working interest. KWG will have a right of first refusal to purchase all ores or concentrates produced by such joint venture whenever its joint venture interest exceeds 50%. Payments under the first stage in respect of the earn-in option total of \$1,500,000 are to be made as follows: funding of \$300,000 for a first program, \$500,000 by February 7, 2014 and \$700,000 by February 7, 2015 and in respect of the exploration expenditures totalling a minimum of \$8,000,000 are to be made as follows: \$3,000,000 payable upon closing, \$2,000,000 by March 31, 2014 and \$3,000,000 by March 31, 2015. The first option payment in the amount of \$300,000 was paid in cash. The Company has the option of making future option payments by way of either cash or stock of the Company. On September 30, 2013, the Company served Bold with written notice that it intended to fund the remaining commitments under stage one,

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

totalling \$6,200,000, as required by this agreement. On February 7, 2014, the Company issued 10,000,000 common shares in satisfaction of the second option payment. On March 17, 2015, the Company issued 35,000,000 common shares to Fancamp in satisfaction of the third option payment. At March 31, 2015, the Company had incurred exploration expenditures of \$5,882,000 towards the \$8,000,000 required under the option agreement. In consideration of a cash payment of \$5,000, Bold agreed to extend the deadline by which the Company must incur the remaining \$2,118,000 in exploration expenditures to September 30, 2015. On October 29, 2015, an agreement was reached with Bold and Fancamp to extend the deadline for a further one year to September 30, 2016 in exchange for KWG issuing 25,000,000 common shares to Fancamp at a deemed value of \$500,000, of which \$300,000 will be credited as a reduction of the exploration expenditures under the agreements.

(vi) The MacFadyen Kimberlites project consists of certain claims on the south shore of the Attawapiskat River west of James Bay. MacFadyen Kimberlites is a joint project between DDI and Cliffs. DDI is the operator of the joint project and currently has a 58.35% interest in the joint project. Ashton Mining Canada Ltd., ("Ashton"), a previous owner, holds a 25% clawback entitlement to any kimberlite found or developed by DDI and/or Cliffs on the MacFadyen Kimberlites property. Ashton can execute the clawback by paying DDI and Cliffs an amount equal to 300% of all exploration expenditures on the property.

(vii) On August 21, 2015, the Company issued 4,000,000 common shares to MacDonald Mines Exploration Ltd. ("MacDonald") to acquire the Hornby Property claims. These claims constitute an extensive holding adjoining the southerly boundary of the Big Daddy property. The property is also adjacent to the Koper Lake property, which lies to the west of it. The shares were valued at the market value on that date of \$0.025 per share, for a total consideration of \$100,000. Under the terms of the agreement, MacDonald will retain a 2% NSR, half of which may be purchased by KWG for \$1,000,000 at any time prior to production from the property. KWG will also have the first right to buy the balance of the NSR at any time the holder proposes to sell it.

11 INTANGIBLE ASSETS

On April 21, 2014, the Company signed an agreement to acquire 50% of the ownership rights in two United States provisional patent applications relating to the production of chromium iron alloys directly from chromite ore, and the production of low carbon chromium iron alloys directly from chromite concentrates (the "Chromium IP Transaction"). The Chromium IP Transaction includes the right to use these provisional patent applications as the basis for filing additional patent applications in the United States, Canada and elsewhere worldwide and includes a fifty-percent interest in any of the vendor's associated intellectual property (the "Chromium IP").

The parties' interests in the Chromium IP is held through a limited partnership (the "LP") established by the vendor and KWG for purposes of completing the Chromium IP Transaction and developing and exploiting the Chromium IP. The limited partners of the LP are a wholly-owned subsidiary of KWG and a corporation beneficially owned by the vendor. The general partner of the LP, which will manage the business of the LP, is another wholly-owned subsidiary of KWG.

The vendor assigned its fifty-percent interest in the Chromium IP to the LP in exchange for 25,000,000 units of KWG (each a "Unit") with each Unit comprising one common share and

KWG RESOURCES INC.**Notes to the Consolidated Financial Statements (in Canadian dollars)**

one common share purchase warrant exercisable at a price of \$0.10 for five years (Note 13(ix)).

On June 25, 2015, the vendor assigned its remaining fifty-percent interest in the Chromium IP to the LP in exchange for 25,000,000 units of KWG with each unit comprising one common share and one common share purchase warrant exercisable at a price of \$0.10 for five years. (Note 13(v)).

All costs associated with this acquisition have been capitalized.

As of December 31, 2015, these patents were still pending and were not ready for use; therefore, no amortization has been recorded in these financial statements.

Number included above held in treasury		
- end of period (Note 5)	5,757,000	-

- (i) On December 8, 2015, the Company issued 25,000,000 common shares in satisfaction of the option payment due under the Bold Ventures project (Note 10(v)). These were valued at the market value on that date of \$0.02 per share, for a total cost of \$500,000.
- (ii) On December 8, 2015, the Company issued 1,130,000 common shares to Maureen O'Mahoney for services rendered. These were valued at the market value on that date of \$0.02 per share, for a total cost of \$22,600.
- (iii) On August 21, 2015, the Company issued 4,000,000 common shares to MacDonald Mines Exploration Ltd. to acquire the Hornby Property (Note 10(vii)). These were valued at the market value on that date of \$0.025 per share, for a total cost of \$100,000.
- (iv) On August 21, 2015, the Company issued 904,000 common shares to Agora Internet Relations Corp. and 1,356,000 common shares to JDBailey Productions for services rendered by these companies. These were valued at the market value on that date of \$0.025 per shares, for a total cost of \$56,500.
- (v) On June 25, 2015, the Company issued 25,000,000 units in conjunction with the Chromium IP Transaction (Note 11), with each unit comprising one common share and one common share purchase warrant exercisable at a price of \$0.10 for five years. The shares were valued at the market value on that date of \$0.015 per share, for a total value of \$375,000. The warrants were valued at \$50,000 using the Black-Scholes valuation model based on the following assumptions: market value of \$0.015 per share, expected dividend yield of 0%, expected volatility of 62%, risk-free rate of return of 0.80% and a life of five years.
- (vi) On March 17, 2015, the Company issued 35,000,000 common shares in satisfaction of the option payment due under the Bold Ventures project (Note 10(v)). These were valued at the market value on that date of \$0.02 per share, for a total cost of \$700,000.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

- (vii) On February 7, 2014, 282,500 common shares were issued to AGORA International Enterprises Corp (“AGORA”) at a market value of \$0.05 per share for a total consideration of \$14,125. On June 17, 2014, 201,785 common shares were issued to AGORA at a market value of \$0.07 per share for a total consideration of \$14,125. On July 21, 2014, 128,410 common shares were issued to AGORA at a market value of \$0.055 per share for a total consideration of \$7,063. On January 22, 2015, 141,250 common shares were issued to AGORA at a market value of \$0.05 per share for a total consideration of \$7,063. These payments were made in full satisfaction of a shares-for-service contract signed on October 7, 2013.
- (viii) On January 27, 2015, 180,800 common shares were issued to RBL Communications Inc. (“RBL”) at a market value of \$0.05 per share for a total consideration of \$9,040. On May 28, 2015, 361,600 common shares were issued to RBL at a market value of \$0.025 per share for a total consideration of \$9,040. On August 21, 2015, 361,600 common shares were issued to RBL at a market value of \$0.025 per share for a total consideration of \$9,040. On December 8, 2015, 141,250 common shares were issued to RBL at a market value of \$0.02 per share for a total consideration of \$2,825. These are the first four payments made under a shares-for-services contract signed on November 20, 2014 (Note 22(iii)).
- (ix) On May 12, 2014, the Company issued 25,000,000 units in conjunction with the Chromium IP Transaction (Note 11), with each unit comprising one common share and one common share purchase warrant exercisable at a price of \$0.10 for five years. The shares were valued at the market value on that date of \$0.075 per share, for a total value of \$1,875,000. The warrants were valued at \$1,075,000 using the Black-Scholes valuation model based on the following assumptions: market value of \$0.075 per share, expected dividend yield of 0%, expected volatility of 78%, risk-free rate of return of 1.50% and a life of five years.
- (x) In April 2014, the Company completed a non-brokered private placement of 2,200,000 “flow-through” units at a price of \$0.10 per unit for a total consideration of \$220,000 (Note 21). Each unit consisted of one “flow-through” common share and one warrant which entitled the holder to purchase one “flow-through” common share for \$0.15 within one year. The warrants were valued at \$8,800 using the Black-Scholes valuation model based on the following assumptions: market value of \$0.065 per share, expected dividend yield of 0%, expected volatility of 73%, risk-free rate of return of 1.05% and a life of one year.
- (xi) In March 2014, the Company completed a non-brokered private placement of 1,000,000 “flow-through” units at a price of \$0.05 per unit for a total consideration of \$50,000. Each unit consisted of one “flow-through” common share and one warrant which entitles the holder to purchase one “flow-through” common share for \$0.10 within three years. The warrants were valued at \$10,317 using a valuation model based on the following assumptions: market value of \$0.05 per share, expected dividend yield of 0%, expected volatility of 65%, risk-free rate of return of 1.23% and a life of three years.

Finder’s fees of \$2,500 in cash and 20,000 compensation options were paid to a qualified party in relation to this private placement. Each compensation option entitles its holder to purchase one non-flow-through common share at a price of \$0.05 for a period of three years from the date of issue. The fair value of the finder’s compensation options was calculated using the Black-Scholes valuation method based on the following assumptions: market value of \$0.05 per share, expected dividend yield of 0%, expected volatility of

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

65%, risk-free rate of return of 1.23% and a life of three years. As a result, the fair value of the compensation options was estimated at \$520.

- (xii) In February 2014, the Company completed non-brokered private placements of 1,700,000 “flow-through” units at a price of \$0.05 per unit for a total consideration of \$85,000. Each unit consisted of one “flow-through” common share and one warrant which entitles the holder to purchase one “flow-through” common share for \$0.10 within three years. The warrants were valued at \$17,192 using the Black-Scholes valuation model based on the following assumptions: for 700,000 warrants - market value of \$0.045 per share, expected dividend yield of 0%, expected volatility of 67%, risk-free rate of return of 1.19% and a life of three years; and for 1,000,000 warrants – market value of \$0.05 per share, expected dividend yield of 0%, expected volatility of 67%, risk-free rate of return of 1.19% and a life of three years.
- (xiii) On February 7, 2014, the Company issued 10,000,000 common shares in satisfaction of the option payment due under the Bold Ventures project (Note 10(v)). These were valued at the market value on that date of \$0.05 per share, for a total cost of \$500,000.
- (xiv) In January 2014, the Company completed non-brokered private placements of 200,000 “flow-through” units at a price of \$0.05 per unit for a total consideration of \$10,000. Each unit consisted of one “flow-through” common share and one warrant which entitles the holder to purchase one “flow-through” common share for \$0.10 within three years. The warrants were valued at \$1,964 using the Black-Scholes valuation model based on the following assumptions: market value of \$0.045 per share, expected dividend yield of 0%, expected volatility of 67%, risk-free rate of return of 1.16% and a life of three years.

14 WARRANTS AND COMPENSATION OPTIONS

Changes in the Company's outstanding common share purchase warrants and compensation options were as follows:

Issued	Year ended December 31, 2015		Year ended December 31, 2014	
	Warrants	Compensation options	Warrants	Compensation Options
Balance – beginning of year	99,370,000	352,000	119,420,000	1,082,000
Issued as part of private placement of units (Note 13 (x)(xi)(xii)(xvi))	-	-	5,100,000	-
Issued for intangible assets (Note 13(v)(ix))	25,000,000	-	25,000,000	-
Issued for finders' compensation (Note 13(xi))	-	-	-	20,000
Expired	(2,200,000)	-	(50,150,000)	(750,000)
Balance – end of year	122,170,000	352,000	99,370,000	352,000
Number included above held in treasury - end of period (Note 5)	21,000,000	-	-	-

Outstanding common share purchase warrants and compensation options entitle their holders to subscribe for an equivalent number of common shares.

KWG RESOURCES INC.**Notes to the Consolidated Financial Statements (in Canadian dollars)**

A summary of the Company's outstanding warrants and compensation options as at December 31, 2015 is presented below:

Number of warrants	Number of compensation options	Exercise price \$	Expiry date
6,000,000	-	0.10	June 2016
21,000,000	-	0.15	August 2016
5,000,000	-	0.10	September 2016
4,760,000	-	0.10	October 2016
27,200,000	-	0.10	November 2016
-	332,000	0.05	November 2016
2,310,000	-	0.10	December 2016
200,000	-	0.10	January 2017
1,700,000	-	0.10	February 2017
1,000,000	-	0.10	March 2017
-	20,000	0.05	March 2017
3,000,000	-	0.12	March 2017
25,000,000	-	0.10	May 2019
25,000,000	-	0.10	June 2020
122,170,000	352,000	0.11	

15 STOCK OPTION PLAN

The Company maintains a stock option plan (the "Plan") whereby the Board of Directors may from time to time grant to employees, officers, directors and consultants of the Company or any subsidiary thereof options to acquire common shares as may be determined by the Board, provided that the exercise price may not be lower than the market price of the common shares at the time of the grant of the options.

As at December 31, 2015, the Plan provides (i) that the maximum number of common shares that may be reserved for issuance under the Plan shall be equal to 10% of the number of issued and outstanding common shares; and (ii) that the maximum number of common shares which may be reserved for issuance to any one optionee pursuant to a share option may not exceed 5% of the common shares outstanding at the time of the grant.

Options vest over an 18-month period: 25% at the date of the grant and 12.5% in each of the following six quarters. Options granted must be exercised over a period no longer than five years after the date of grant, and they are not transferable.

KWG RESOURCES INC.
Notes to the Consolidated Financial Statements (in Canadian dollars)

A summary of changes in the Company's stock options outstanding is presented below:

Options

	Year ended December 31, 2015		Year ended December 31, 2014	
	Number of shares	Average exercise price	Number of shares	Average exercise price
Balance – beginning of year	69,181,000	0.111	66,404,500	0.111
Granted	54,214,000	0.050	8,400,000	0.100
Expired	(37,045,000)	0.118	(5,623,500)	0.100
Balance – end of year	86,350,000	0.069	69,181,000	0.111

The following table summarizes information about options outstanding and exercisable as at December 31, 2015:

		Outstanding options	Exercisable options
Exercise price	Number of options	Average contractual life (in years)	
0.050	54,214,000	4.72	25,419,500
0.100	28,636,000	2.30	28,636,000
0.115	3,500,000	0.23	3,500,000
0.069	86,350,000	3.74	57,555,500

Total share-based compensation costs for the year ended December 31, 2015 amounted to \$316,210 (2014 – \$411,780).

The fair value of the options granted in 2015 and 2014 was estimated using the Black-Scholes option pricing model based on the following assumptions:

	December 2015	August 2015	April 2014
Market value per share	\$0.020	\$0.015	\$0.085
Expected dividend per share	Nil	Nil	Nil
Expected volatility	85.73%	70.59%	79.48%
Risk-free interest rate	0.74%	0.53%	1.67%
Life of the options granted	5 years	5 years	5 years
Weighted average of estimated fair value of each option granted	\$0.010	\$0.005	\$0.052

16 NON-CONTROLLING INTEREST

The amount shown for non-controlling interest on the consolidated balance sheets is in relation to a non-controlling interest ownership (29.19%) in the shares of DDI. Non-controlling interests' share of DDI expenses are reflected in the consolidated statements of operations

KWG RESOURCES INC.**Notes to the Consolidated Financial Statements (in Canadian dollars)**

and are charged as a reduction to the non-controlling interest account on the consolidated balance sheets.

17 GENERAL AND ADMINISTRATIVE EXPENSES

The Company's general and administrative expenses consist of the following:

Years ending December 31	2015	2014
Advertising and promotion	139,601	131,814
Consultants' fees	270,457	463,266
Directors' fees and insurance	109,610	120,088
Filing fees	32,990	52,360
Gain on disposal of property and equipment	-	(6,000)
Investor relations fees	54,559	128,459
Professional fees	280,381	1,136,933
Office overheads	399,223	294,672
Salaries and benefits	763,283	912,270
Travel and accommodation	38,037	94,930
Administrative recovery	-	(110,911)
	2,088,141	3,217,881

18 FINANCE INCOME

Years ended December 31	2015	2014
Interest income	3,907	43,090
Net change in fair value of financial assets through profit or loss	-	35,000
Premium on flow-through share issuance	-	68,200
Finance income	3,907	146,290

19 INCOME TAXES**Provision for Income Taxes**

A reconciliation between tax expense and the product of accounting loss multiplied by the Corporation's combined federal and provincial tax rate is as follows:

	2015	2014
Statutory tax rate	26.50%	26.50%
Loss before income taxes	(7,445,081)	(3,673,926)
Expected income tax recovery based on statutory rate	(1,973,000)	(974,000)
Adjustment to expected income tax benefit:		
Effect of flow-through renunciation	-	97,000
Share-based compensation	84,000	109,000
Deferred tax assets acquired	(2,914,000)	-
Other	1,908,000	(154,000)
Change in benefits not recognized	2,895,000	922,000
Deferred income tax provision (recovery)	-	-

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off the current tax assets and current tax liabilities or deferred tax assets and liabilities and they relate to taxes levied by the same tax authority.

KWG RESOURCES INC.
Notes to the Consolidated Financial Statements (in Canadian dollars)

Deferred Income Tax Balances

Deferred income tax assets have not been recognized in respect of the following deductible temporary differences:

Deductible Temporary Differences	Dec 31, 2015	Dec 31, 2014
Exploration and evaluation projects	7,581,000	934,000
Non capital loss carry-forwards	12,505,000	8,905,000
Capital loss carry-forwards	80,271,000	79,577,000
Share issue costs	76,000	105,000
Marketable securities	2,725,000	2,050,000
Property and equipment	2,487,000	2,454,000
	105,645,000	94,025,000

Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profits will be available against which the Company and its subsidiaries will be able to utilize the benefits.

At December 31, 2015, the Company has unclaimed non-capital losses of \$12,505,000 (2014 - \$8,905,000 expiring at various dates through 2034) which will expire at various dates through 2035. All other temporary differences can be carried forward indefinitely.

20 LOSS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share:

Years ended December 31	2015	2014
Weighted average number of shares outstanding – basic and diluted	817,734,113	766,420,896
Net loss for the year	(7,429,365)	(3,673,926)
Loss per share for the year		
Basic and diluted	(0.01)	(0.00)
Non-dilutive securities:		
Stock options	86,350,000	69,181,000
Warrants and compensation options	122,522,000	97,722,000

21 RELATED PARTY TRANSACTIONS

The Company defines its officers (CEO, CFO and corporate secretary) and directors as Key Management Personnel (“KMP”). During 2015, officers and companies controlled by officers charged consulting fees for cash consideration of \$164,668 (\$241,581 in 2014) and salaries and bonuses in the amount of \$304,615 (\$368,481 in 2014) of which \$167,947 remained payable at December 31, 2015 (\$13,875 in 2014). The consulting fees were for services performed by the corporate secretary and the CFO as well as for general accounting services. Directors’ fees charged in 2015 totalled \$93,550 (\$103,538 in 2014) of which \$60,750 remained payable at December 31, 2015 (\$nil in 2014). KMP received 34,914,000 stock options in 2015 (6,200,000 in 2014). In 2015, stock compensation expenses totalled \$221,310 for KMP (\$278,405 in 2014) (Note 27).

Included in the April 2014 private placements were 800,000 flow-through units subscribed for by KMP for gross proceeds of \$80,000 (Note 13(x)).

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Debut Diamonds Inc.

The Company shares management, administrative assistance and facilities and other technical personnel with DDI in an arrangement not covered by a written agreement. Prior to 2014, the costs charged to DDI were equal to the costs incurred by the Company. Since 2013, the Company has not charged DDI for overhead and personnel charges. At December 31, 2014, the receivable balance was \$1,444,442 including interest of \$134,291. The entire receivable balance was subject to a loan agreement dated January 1, 2013. Under the loan agreement, interest was charged at 5% per annum compounded annually and the loan was to mature on January 2, 2016. Due to the uncertainty of collection, this interest had not been accrued in the financial statements. The agreement also contained a conversion provision whereby KWG could convert the amount of the loan outstanding including any accrued but unpaid interest thereon, or any portion thereof, into common shares of DDI at a rate of \$0.05 per common share. This debt was secured by a general security agreement over the assets of DDI at a rate of \$0.01 per share. On January 27, 2015, the debt was settled in exchange for 144,464,000 common shares of DDI (Note 5).

22 COMMITMENTS AND CONTINGENCIES

(i) The Company has incurred approximately \$13 million of expenditures which have been passed through to shareholders as eligible expenditures for their purposes under flow-through agreements. As noted in Note 3 to these consolidated financial statements, there is a risk that some or all of these claims may be disallowed. To the extent that the costs are disallowed as deductions to shareholders, additional tax attributes would be created for the Company which would be considered for recognition at that time. Additional costs may be incurred. The Company has indemnified the subscribers of current and previous flow-through share offerings against any tax related amounts that become payable by the shareholder as a result of the Company not meeting its expenditure commitments.

The Canada Revenue Agency ("CRA") recently conducted an audit of the Company's flow-through expenditures for the calendar years 2010 through 2013. As a result of the audit, CRA has proposed an adjustment to the amount of qualifying expenditures that were renounced to the subscribers aggregating approximately \$6,700,000. In addition, CRA has assessed additional Part XII.6 tax of approximately \$1,103,180, including penalties and interest. The Company has made a provision for the entire amount of the estimated Part XII.6 tax, penalties and interest. Additionally, a provision in the amount of \$3,837,217 has been set up for the estimated subscriber indemnification costs based on the highest personal income tax rates in the Province of Ontario at the time these expenditures were renounced to the subscribers plus the Federal and Ontario investment tax credits available at the time. The Company has reviewed CRA's proposals and it disagrees with certain positions taken by CRA. The Company intends to file formal objections to dispute the assessments once they are issued.

Certain tax-related conditions may exist at the date the financial statements are issued which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company does not record any liability for such future events until such time as the events are probable and reasonably determinable.

(ii) The Company has signed an operating lease for its premises located at 141 Adelaide St. W., Suite 420, Toronto, On, M5H 3L5. The lease is a net lease with a term of five years commencing on August 1, 2012. Monthly minimum rental payments are \$5,326 for October 1, 2012 through July 31, 2014 and \$5,568 for August 1, 2014 through July 31, 2017. There were no payments due for August and September 2012. The Company is also responsible for its proportionate share of the operating costs in relation to this space.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

In addition to waiving the first two months rental payments, the landlord reimbursed the Company for the amount of \$28,002 in relation to leasehold improvements and moving costs. The total amount of these inducements will be amortized over the life of the lease (Note 12).

- (iii) In accordance with an agreement with RBL Communications Inc. ("RBL") to implement and manage a complete online awareness and marketing program, the Company has committed to issue shares to RBL with a market value of \$2,825 in January 2016. As of the date of these financial statements, these shares had not yet been issued.
- (iv) In accordance with an agreement with AGORA Internet Relations Corp ("AGORA") to produce the KWG Ring of Fire Documentary, the Company has committed to issue shares to AGORA with a market value of \$22,600 in February 2016 and \$20,340 in May 2016. As of the date of these financial statements, these shares had not yet been issued.
- (v) Under the terms of an employment agreement with the Company's CEO dated October 8, 2008, in the event of a change in control of the Company and the CEO's employment is involuntarily terminated within three years following the change in control, the Company shall pay the CEO an amount equal to three times his then-current base salary and three times his annual bonus most recently paid or accrued along with any unpaid salary and vacation pay. The contract requires payments totaling \$1,140,000 for the change of control and \$570,000 for the termination clause. As the triggering events have not taken place, the contingent payments have not been reflected in these consolidated financial statements.
- (vi) The Company's exploration and evaluation activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

23 FINANCIAL INSTRUMENTS AND FAIR VALUES

Overview

The Company has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk;
- market risk;

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

Risk Management Framework

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board fulfils its responsibility through the Audit Committee, which is responsible for overseeing the Company's risk management policies.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management practices are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company has an established code of

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

conduct which sets out the control environment within which framework all directors' and employees' roles and obligations are outlined.

The Company's risk and control framework is facilitated by the small-sized and hands-on executive team.

Credit Risk

Credit risk is the risk of an unexpected financial loss to the Company if a customer or third party to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's cash and cash equivalents, receivables and marketable securities.

(i) Cash and Cash Equivalents

The Company's cash and cash equivalents are held through large Canadian financial institutions. The Company has a corporate policy of investing its available cash in Canadian government instruments and certificates of deposit or other direct obligations of major Canadian banks, unless otherwise specifically approved by the Board. The Company does not own asset-backed commercial paper.

(ii) Receivables

The Company's receivables consist primarily of trade receivables and amounts due from related and unrelated parties. When necessary, the Company establishes an allowance for impairment that represents its estimate of incurred losses in respect of receivables.

Furthermore, when the Company engages in corporate transactions, it seeks to manage its exposure by ensuring that appropriate recourse is included in such agreements upon the counterparty's failure to meet contractual obligations.

(iii) Marketable Securities

The Company invests only in securities of companies listed on public stock exchanges and warrants of those companies. There is no active market for these warrants. Such strategic investments are approved by the Board of Directors of the Company. Management actively monitors changes in the markets and management does not expect any counterparty to fail to meet its obligations. The Company's investments are generally in the junior natural resources sector and these companies are subject to similar areas of risk as the Company itself.

(iv) Guarantees

The Company's policy is to provide financial guarantees only to wholly-owned subsidiaries or under business arrangements where the benefit of the guarantee will ensure to the Company. At December 31, 2015, the Company had \$nil in guarantees outstanding (2014 - \$nil).

The Company's maximum exposure to credit risk at the reporting date was:

	Notes	December 31, 2015	December 31, 2014
Carrying amount			
Cash and cash equivalents	6	37,247	1,388,369
Receivables	7	139,812	764,149
Financial assets classified as AFS	8	75,568	73,735
Financial assets classified at FVTPL	8	-	63,000
		252,627	2,289,253

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking undue damage to the Company's reputation.

The Company's objective is to maintain sufficient capital in order to meet short-term business requirements after taking into account cash flows from operations and the Company's holdings of cash and cash equivalents and marketable securities. This is accomplished by budgets and forecasts which are updated on a periodic basis to understand future cash needs and sources. Spending plans are adjusted accordingly when possible to provide for liquidity.

The Company manages its liquidity risk through the mechanisms described above and as described in Capital Management Disclosures (Note 25). The Company has historically relied on issuances of shares to develop projects and to finance day-to-day operations and may do so again in the future.

The Company has no significant long-term liabilities. All other contractually obligated cash flows are payable within the next fiscal year.

Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, commodity prices and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return.

Foreign Currency Risk

The Company is exposed to foreign currency risk on purchases and other payables that are denominated in a currency other than the functional currency of the Company; the Canadian dollar. The currencies in which these transactions are denominated, when they occur, are the United States dollars (US\$). The Company does not actively hedge its foreign currency exposure. A 10% strengthening or weakening of the US\$ would not have a material impact on the Company's equity or results of operations.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash equivalents earn interest at variable short-term rates. The estimated effect of a 0.50% change in interest rates would not have a material effect on the Company's results of operations. None of the Company's other financial instruments is interest-bearing. Consequently, the Company is not exposed to any significant interest rate risk which could be caused by a sudden change in market interest rates.

Other Market Price Risk

The Company's marketable securities and strategic investments are subject to equity price risk. The values of these investments will fluctuate as a result of changes in market prices, the price of metals or other factors affecting the value of the investments.

Commodity price risk is the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. Historically, such prices have fluctuated and are affected by numerous factors outside of the Company's control, including, but not limited to:

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

industrial and retail demand, central bank lending, forward sales by producers and speculators, levels of worldwide production, short-term changes in supply and demand because of speculative hedging activities and other factors such as significant mine closures. The Company does not currently have any hedging or other commodity-based risks respecting its operations. The value of the Company's strategic investments is also related to the price of, and outlook for, base and precious metals and other minerals.

24 DETERMINATION OF FAIR VALUES

Measurement Categories

As explained in Note 3, financial assets and liabilities have been classified into categories that determine their basis of measurement and, for items measured at fair value, whether changes in fair value are recognized in the consolidated statement of operations or comprehensive loss. Those categories are: fair value through profit or loss; loans and receivables; available for sale assets; and, for liabilities, amortized cost.

The following table shows the carrying values of financial assets and liabilities for each of these categories at the reporting date.

	Notes	December 31, 2015	December 31, 2014
Assets			
Loans and receivables			
Cash	6	37,247	126,558
Receivables	7	139,812	764,149
Available for sale			
Marketable securities	8	75,568	73,735
Fair value through profit and loss			
Cash equivalents	6	-	1,261,811
Marketable securities	8	-	63,000
Liabilities			
Amortized cost			
Trade and other payables and provisions	12	5,868,038	187,135

A number of the Company's accounting policies and disclosures require the determination of fair value for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the methods described below. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(i) Marketable securities

The fair value of marketable securities included in financial assets at fair value through operations or OCI is determined by reference to their quoted market closing bid price at the reporting date.

Fair Value Hierarchy

The different levels of valuation are defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
Level 3: Inputs for the asset or liability are not based on observable market data (unobservable inputs).

KWG RESOURCES INC.**Notes to the Consolidated Financial Statements (in Canadian dollars)**

The table below analyzes financial instruments carried at fair value by valuation method:

	Level 1	Level 2	Level 3	Total
As at December 31, 2015				
Assets				
Marketable securities classified as AFS	75,568	-	-	75,568
Total assets	75,568	-	-	75,568
As at December 31, 2014				
Assets				
Cash equivalents	-	1,261,811	-	1,261,811
Marketable securities classified as AFS	73,735	-	-	73,735
Marketable securities classified as FVTPL	-	63,000	-	63,000
Total assets	73,735	1,324,811	-	1,398,546

(ii) Warrants

The fair values of equity warrants are based upon the Black-Scholes option-pricing model. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility adjusted for changes expected due to publicly available information), weighted average expected life of the instruments (based on historic experience and general option-holder behaviour), expected dividends and the risk-free interest rate (based on government bonds). Note 8 contains details of these inputs.

(iii) Receivables

The fair value of receivables is estimated at their book value due to their short term nature. Receivables are generally due within 30 days.

(iv) Non-derivative Financial Liabilities

Fair value, which is determined for disclosure purposes and approximates the carrying value of trade and other payables due to their short-term nature, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

(v) Cash equivalents

As cash equivalents are readily converted into cash the fair value of cash equivalents is determined by reference to this value.

25 CAPITAL MANAGEMENT DISCLOSURES

The Company's objective when managing capital is to safeguard its accumulated capital in order to provide an adequate return to shareholders by maintaining a sufficient level of funds to support continued project development and corporate activities. Capital is defined by the Company as the aggregate of its shareholders' equity. Shareholders' equity totalled \$37,918,324 at December 31, 2015 and \$43,354,624 at December 31, 2014.

The Company manages its capital structure and makes adjustments to it based on the level of funds available to the Company to manage its operations. In order to maintain or adjust the capital structure, the Company expects that it will be able to obtain equity, long-term debt, equipment-based financing and/or project-based financing sufficient to maintain and expand its operations. There are no assurances that these initiatives will be successful. In order to achieve these objectives, the Company invests its unexpended cash in highly-liquid, rated financial instruments. There were no changes in the Company's approach to capital management during 2015 and 2014. The Company is not subject to externally imposed capital requirements.

KWG RESOURCES INC.

Notes to the Consolidated Financial Statements (in Canadian dollars)

26 SEGMENTED INFORMATION

Operating segments are reported in a manner consistent with the way in which the Company's executive officers review business performance on a quarterly basis. The Company's operations comprise a single reporting operating segment engaged principally in mineral exploration in Canada. As the operations comprise a single reporting segment, amounts disclosed in the consolidated financial statements also represent segment amounts.

27 SUBSEQUENT EVENTS

In April 2016, pursuant to the non-brokered private placement announced on March 31, 2016, the Company issued 84,250,013 units at \$0.02 each for gross proceeds of \$1,685,000. Each unit comprises one common share and one warrant which entitles the holder to acquire one common share for \$0.05 within five years from closing. KWG has agreed to pay finder's fees equal to 2,604,500 units. Included in this placement is \$600,000 in settlement of amounts payable to directors, officers, employees and consultants.
