KWG RESOURCES EXTENDS CONVERTIBLE DEBENTURE TERM

Toronto, Canada, October 3, 2019 - **KWG Resources Inc.** (CSE: KWG; KWG.A) (FRANKFURT: KW6) (“KWG” or the “Corporation”) has agreed to extend to December 2nd, 2019 the time within which the holder of its \$500,000 convertible debenture may elect to exercise its conversion option. Within that time all or part of the sum secured by the debenture is convertible at the option of the holder into units with a deemed value of \$21 per unit (each a “Unit”).

Each Unit is comprised of four (4) KWG.A multiple voting shares and four (4) multiple voting share purchase warrants, with each such warrant enabling its holder to acquire one further KWG.A multiple voting share from treasury upon payment of \$7.50 at any time on or before December 15, 2019. The debenture bears interest at a rate of 12% per annum, accruing daily, compounding annually and payable at the earlier of maturity, redemption or conversion, in KWG.A multiple voting shares from treasury at their volume-weighted average price for the ten trading days prior to payment. The debenture secures repayment of the principal, plus interest earned thereon to the date of payment, plus a premium of 3%.

About KWG:

KWG is the Operator of the Black Horse Joint Venture (‘JV’) after acquiring a vested 50% interest through Bold Ventures Inc (‘Bold’) from Fancamp Exploration Ltd (‘Fancamp’). KWG funds all JV exploration expenditures and Bold is carried for a 20% interest in KWG’s interest.

KWG also owns 100% of Canada Chrome Corporation which has staked claims and conducted a surveying and soil testing program, originally for the engineering and construction of a railroad to the Ring of Fire from Aroland, Ontario.

KWG subsequently acquired intellectual property interests, including a method for the direct reduction of chromite to metalized iron and chrome using natural gas and an accelerant. KWG subsidiary, Muketi Metallurgical LP, has received a patent for the direct reduction method in Canada, South Africa and Kazakhstan and is prosecuting remaining patent applications in India, Indonesia, Japan, South Korea and Turkey. It has also received a USA patent for production of low carbon chromium iron alloys and a corresponding Canadian patent application is expected to issue soon.
